

UMER WAQAS

Software Engineer | AI, Full Stack & Mobile | Vibe Coding

Islamabad, Pakistan | +92 345 9347900 | um.waqas.khan@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Upwork](#)

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building production web, mobile, and AI-powered products. Strong in Python, Node.js, React/Next.js, Flutter, APIs, databases, cloud deployment, and LLM/RAG integrations. Good in vibe coding and AI-assisted development using Claude Code, Cursor AI, and prompt-driven workflows to prototype, debug, refactor, and ship features significantly faster. Experienced in leading delivery across a 20+ person team and working directly with international clients. Top Rated on Upwork with 100% Job Success across 48+ projects.

CORE SKILLS

AI & Automation: OpenAI / Claude APIs, LLM integration, RAG, vector databases, LangChain, LlamaIndex, AI agents, prompt workflows

Frontend & Mobile: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Flutter, Dart, responsive UI

Backend & Data: Python, FastAPI, Node.js, Express, REST, GraphQL, PostgreSQL, MongoDB, Firebase, SQL/NoSQL

AI-Assisted Engineering: Claude Code, Cursor AI, AI pair programming, rapid prototyping, Git, Docker, CI/CD, AWS/GCP, production debugging

PROFESSIONAL EXPERIENCE

AI Full Stack Developer | Fluttydev - Agency

2020 - Present

- Lead delivery of AI-powered web, mobile, and automation products for international clients, coordinating engineering and product work across a 20+ member team.
- Build and ship production applications using Python, Node.js, React/Next.js, Flutter, databases, cloud services, payment systems, and third-party APIs.
- Advanced user of Claude Code and Cursor AI for prompt-driven development, rapid prototyping, debugging, refactoring, code generation, and multi-file implementation; these AI-assisted workflows reduced delivery time by approximately 60% while maintaining production quality.
- Handle solution architecture, deployment, client communication, debugging, technical reviews, and post-launch support across multiple products.

AI / Full Stack Developer | Upwork - Freelance

2022 - Present

- Top Rated freelancer with 100% Job Success across 48+ projects spanning AI integrations, SaaS, automation, backend systems, web applications, and mobile products.
- Delivered AI MVPs in under 5 days for selected engagements and automated workflows that saved clients 10+ hours per week.
- Implemented LLM integrations, RAG workflows, vector database solutions, API services, authentication, data processing, and cloud deployments.
- Translate business requirements into scoped, maintainable production solutions and rapid iterations for global clients.

Full Stack Developer | Tech Solutions Inc.

2023 - 2024

- Developed and maintained client-facing web applications and backend services in production environments.
- Contributed to migration from legacy systems toward modern service-based architecture, improving maintainability and reducing page-load time by approximately 40%.

Junior Developer | Web Agency

2022 - 2023

- Built 10+ responsive websites and contributed across requirements gathering, implementation, testing, deployment, and client revisions.

SELECTED PROJECTS & PREVIOUS WORK

AI Influencer Generator | Flutter | Next.js | Python | AI APIs • Live Preview

Cross-platform AI product for creating consistent AI influencers and generating image/video assets. Includes production AI integrations, subscriptions, usage tracking, content workflows, and App Store / Google Play delivery.

Askly - AI Database Agent | Go | React | Electron | Firebase • Live Preview

Desktop SaaS that connects to databases and lets users query and explore data in natural language. Includes a Go backend, Electron/React desktop client, Firebase authentication, and AI-driven database interaction.

WorkForge - Freelance Marketplace & Escrow | Laravel 11 | Livewire 3 | Tailwind • Portfolio Preview

Full freelance marketplace covering job discovery, proposals, profiles, contracts, milestones, escrow-style payments, checkout, wallet/ledger flows, messaging, and administrative operations.

OnePDF: Everything PDF | Mobile | PDF Processing | App Store • App Store

Production iOS utility for scanning, image-to-PDF, merging, splitting, compressing, signing, OCR-style workflows, and document management.

nichetraffickit.com | Next.js | TypeScript | Go | AI-Assisted Dev • Live Preview

Traffic-focused web platform built with a modern full-stack architecture using Next.js, TypeScript, Go, and AI-assisted development workflows.

ChatBase Clone - AI Knowledge Chatbots | AI | RAG | Vector Search | Web • Live Preview

AI chatbot platform for creating assistants trained on uploaded documents, pasted text, or website content, with chunking, embeddings, vector retrieval, configurable prompts, and deployable chat experiences.

Microphone Amplifier | Android | Audio Utility | Mobile • Portfolio Preview

Android audio utility for live microphone amplification, sound boosting, noise reduction, and low-latency audio monitoring.

TrendSnap Trading Tips FX | Android | Financial Analytics | APIs • Portfolio Preview

Mobile financial analytics application providing market insights, real-time trend analysis, technical signals, and trading-focused data views.

EDUCATION

Master of Computer Science	University of Science & Technology Bannu 2021 - 2022
Bachelor of Engineering - Mechatronics	University of Engineering & Technology Peshawar 2017 - 2020

ADDITIONAL STRENGTHS

Good in vibe coding • Claude Code & Cursor AI • AI-assisted / prompt-driven development • Product architecture • Client communication • Technical leadership • Mentoring • Rapid prototyping • Debugging & performance optimization • App Store / Google Play releases • Payments & subscriptions • Agile delivery • API integrations
